

PEDESTAL MOUNTED MAN LIFTS

We work with all the major Aerial Work Platform manufacturers and can provide swing bearing up assemblies or design and build a custom boom assembly. Our team of Professional Engineers have designed and assembled over 10 custom installations with outstanding results.

Power systems can include AC, DC, Combustion Engine or Air.

Foundation Engineering support is provided with floor loads and moments, load concentrations as well as bolt load and sizing.

All systems are designed compliant with current ANSI, OSHA and local building codes.
